APPLICATION SECURITY AND DEVELOPMENT (ASD) STIG REVISION HISTORY

Version 5, Release 1

23 October 2020

Developed by DISA for the DoD

UNCLASSIFIED

REVISION HISTORY			
Revision Number	Document Revised	Description of Change	Release Date
V5R1	- Application Security and Development STIG, V4R11	- DISA migrated the Application Security and Development STIG to a new content management system. The new content management system renumbered all Groups (V-numbers) and Rules (SV-numbers). With the new Group and Rule numbers, DISA incremented the version number from V4R11 to V2R1. - APSC-DV-001620, APSC-DV-001630 - Corrected TLS version reference. Changed TLSV1.1 to TLSV1.2 or higher. - APSC-DV-000940 - Corrected check content: The word reestablishing was missing an "h". - APSC-DV-000610 - Removed requirement based on SRG-APP-000353 removal.	23 October 2020
V4R11	- Application Security and Development STIG, V4R10	- V-70165 - Added "not" to the finding statement. - V-70243 - Deleted requirement from STIG. NA requirement that is ancillary to an application and would fall under the firewall SRG guidance.	24 July 2020
V4R10	- Application Security and Development STIG, V4R9	- V-69501 - Updated the check language to specify that if value is NOT checked, it is a finding.	25 October 2019
V4R9	- Application Security and Development STIG, V4R8	- V-69371 - Reference to logging session ID's was removed from the discussion. - V-69381 - Changed requirement to "grant privileges" instead of "access privileges". - V-69417 - Removed the requirement from the STIG. - V-70345 - Updated discussion regarding CCB. Removed "can be tracked" and replaced with "can't be tracked".	25 January 2019
V4R8	- Application Security and Development STIG, V4R7	- V-70157 - Modified to not display passwords/PINs as clear text. - V-70317 - Removed the duplicate V-70317 entry in the Manual STIG benchmark. - V-70395 - Changed CCI-003372 to CCI-003376.	26 October 2018

REVISION HISTORY			
Revision Number	Document Revised	Description of Change	Release Date
V4R7	- Application Security and Development STIG, V4R6	- V-70159 - Added clarification to vulnerability discussion regarding access to encryption modules.	27 July 2018
V4R6	- Application Security and Development STIG, V4R5	- V-70369 - Added reference to Windows file hashing utility. - V-70305 - Deleted AO risk acceptance requirement for open source software.	27 April 2018
V4R5	- Application Security and Development STIG, V4R4	- V-70415 - Changed CCI from CCI-001275 - The organization defines the activities which will trigger alerts to security personnel of inappropriate or unusual activities. TO: - CCI-001274 - The organization employs automated mechanisms to alert security personnel of organization-defined inappropriate or unusual activities with security implications.	26 January 2018
V4R4	- Application Security and Development STIG, V4R3	- V-69349 - Updated check, adding NA statement when the application has no interactive user interface; changed from CAT II to CAT III. - V-69351 - Updated check, added NA statement: if the only way to access the application is through the OS console. - V-70147 - Updated vul discussion: ensure a user does not retain any rights that may have been granted prior to a change in user privilege. - V-70425 - Changed the CCI from CCI-001567 to CCI-002052.	27 October 2017
V4R3	- Application Security and Development STIG, V4R2	- V-70189 (NSA approved crypto) - Removed reference to NSA Suite B. - V-70191 (use FIPS crypto when signing) - Elaborated on signing and added finding for using SHA1 algorithm when signing app components. - V-70193 (use FIPS crypto when hashing) - Elaborated on hashing and added finding for using SHA1 algorithm when generating hashes and added finding for using SHA1 algorithm when generating hashes.	28 April 2017

REVISION HISTORY			
Revision Number	Document Revised	Description of Change	Release Date
V4R2	- Application Security and Development STIG, V4R1	- Added section 4.3 Mobile Code to the Overview document. Includes mobile code definitions and risk categories. - V-69553 (Device authenticators) - Modified requirement to place more emphasis on device authentication over user authentication. - V-70409 (Uncategorized mobile code) - Removed hyperlink reference to old guidance containing mobile code risk categories. - V-69283 (SAML) - Removed DoS mitigation.	27 January 2017
V4R1	- N/A	- Initial Release.	28 July 2016
