TREND MICRO TIPPINGPOINT STIG
REVISION HISTORY

27 July 2022

Developed by Trend Micro and DISA for the DoD

REVISION HISTORY			
Revision Number	**Document Revised**	**Description of Change**	**Release Date**
V1R2	- Trend Micro TippingPoint IDPS STIG, V1R1	- TIPP-IP-000010, TIPP-IP-000020, TIPP-IP-000030, TIPP-IP-000040, TIPP-IP-000050, TIPP-IP-000060, TIPP-IP-000070, TIPP-IP-000350 - Added note explaining that if the site has set up a security profile and is not using the default profile, then this should be inspected using the site's SSP for compliance. - TIPP-IP-000070, TIPP-IP-000240, TIPP-IP-000250, TIPP-IP-000380, TIPP-IP-000400, TIPP-IP-000410, TIPP-IP-000420 - Changed "security-optimized" to "Default." Added note explaining that if the site has set up a security profile and is not using the default profile, then this should be inspected using the site's SSP for compliance. - TIPP-IP-000080 - Removed this requirement because TippingPoint is not a Layer 3 inspection device. TippingPoint inspects L2 segments, which are always the same network. - TIPP-IP-000270 - Changed the Fix procedure to search for an updated list instead of giving a static list in the procedure, since the DDoS filters change frequently. - TIPP-IP-000290 - Changed the Check and Fix procedures to use a DV filter since the traffic management rules are not as robust. - TIPP-IP-000300 - Changed the Fix procedure to search for an updated list instead of giving a static list in the procedure since the ICMP filters change frequently. **No Updates This Release:** - Trend Micro TippingPoint NDM STIG, V1R1	27 July 2022
V1R1	- N/A	- Initial Release.	08 June 2021
