Table 1: Configuration Policy Rules for COPE.....	1
Table 2: Configuration Policy Rules for COBO.....	6

Unified Endpoint Management (UEM) empowers enterprise IT administrators with powerful tools to centrally set up, deploy, secure, control, and maintain desktops, laptops, smartphones, tablets, wearables, and Internet of Things (IoT) devices. Samsung has collaborated with the leading UEM providers to ease the management of Samsung devices, which feature the Knox Platform for Enterprise. To set up Samsung devices using popular UEM platforms, go to: <https://docs.samsungknox.com/admin/uem/index.htm>

All APIs used to implement the policies are listed in the comment column in the following tables.
