UNCLASSIFIED

## Vendor STIG Acronym List

### Introduction

File names for vendor-developed Security Technical Implementation Guides (STIGs) will use the acronyms noted below to reduce file name length. Shorter names, as noted below, will remain spelled out.

This document will be updated as needed.

### Acronym List

| Vendor/Technology Name            | Acronym/Name |
|-----------------------------------|--------------|
| A-10 Networks                     | A10          |
| Adobe                             | Adobe        |
| AirWatch                          | AW           |
| Akamai                            | Akamai       |
| Apache                            | Apache       |
| Apple                             | Apple        |
| Asterisk                          | ASTK         |
| Authentication Brokerage Services | ABS          |
| AvePoint                          | AP           |
| BIND                              | BIND         |
| BlackBerry                        | BB           |
| Bromium                           | BRO          |
| Canonical                         | CAN          |
| Cisco                             | Cisco        |
| Citrix                            | Citrix       |
| Collibra                          | COLL         |
| Computer Associates               | CA           |
| Crunchy Data                      | CD           |
| DB Networks                       | DBN          |
| Docker                            | Docker       |
| EnterpriseDB                      | EDB          |
| Ersi                              | Ersi         |
| Forescout                         | FS           |
| Fortinet                          | FN           |
| GitHub                            | GitHub       |
| Google                            | Google       |
| Hazelcast                         | HC           |
