

UNCLASSIFIED

Non-STIG Readme

Version 3, Release 7

17 April 2023

Developed by DISA for the DOD

UNCLASSIFIED

This Readme file describes the files that may be contained within this package and their usage.

The “STIG” file includes the requirements that are applicable, configurable, and selected on a DOD Baseline.

The files in this package represent the different “Status” assignments of the SRG requirements analyzed for this STIG.

The statuses listed below will not be included in the published STIG.

Status	Description
DNM	Applicable, not configurable, and does not meet the requirement.
IM	Applicable, not configurable, and inherently meets the requirement.
NA	Not applicable (to this product).

The folder will contain the following:

File	Description
CUI_[technology_name]_VxRx-x-DNM-xccdf.xml U_[technology_name]_VxRx-x-IM-xccdf.xml U_[technology_name]_VxRx-x-NA-xccdf.xml	These are XCCDF XML documents that contain the manual content of the SRG or STIG.
STIG_unclass.xsl STIG_cui.xsl	These are XSLT stylesheets used for converting the XCCDF document into HTML for viewing in a web browser.
DoD-DISA-logos-as-JPEG.jpg	This is a JPEG image that contains the DOD and DISA logos that are displayed at the top of the document when viewed as HTML.
