## LIST OF TABLES

Table 1: Configuration Policy Rules for COBO .....	1
Table 2: Configuration Policy Rules for COPE .....	7
Table 3: KPE Equivalent APIs.....	13
Table 4: KSP App Separation.....	15

Unified Endpoint Management (UEM) empowers enterprise IT administrators with powerful tools to centrally set up, deploy, secure, control, and maintain desktops, laptops, smartphones, tablets, wearables, and Internet of Things (IoT) devices. Samsung has collaborated with the leading UEM providers to ease the management of Samsung devices, which feature the Knox Platform for Enterprise (KPE). To set up Samsung devices using popular UEM platforms, go to: <https://docs.samsungknox.com/admin/uem/index.htm>.

All policies listed in the document are implemented using Android Enterprise (AE) APIs. If the management tool does not implement the AE policy, a KPE API may be available to use as a substitute either directly by the management tool or via Knox Service Plugin (KSP). In this situation, look for an “\*” next to the AE API in the comment of the associated policy row, which indicates a KPE substitute is available. To keep these tables as simple as possible, substitute KPE APIs will not be listed in the tables here. Refer to [Table 3](#) in this document for the full list of available substitutions.

In some cases, a KPE API could be used to allow additional features while remaining STIG compliant. Details of this are provided in the comment of the associated policy row.

**Table 1: Configuration Policy Rules for COBO**

Policy Group	Policy Rule	Options	Settings	Related Requirement	Comment
<b>Device Enrollment Configuration</b>	Default device enrollment	Fully managed, Work Profile for company-owned devices, Work Profile for personally owned devices	Fully managed	KNOX-14-110010	Enroll device as an Android Enterprise device.
<b>Device User Agreement</b>	User agreement		Include DOD-mandated warning banner text in User Agreement	KNOX-14-110020	Include the warning banner text in the User Agreement.  Alternatively, but not preferred, include on the lock screen information:  API: setDeviceOwnerLockScreenInfo
<b>Device Password Policies</b>	Minimum password quality	Unspecified, Something, Numeric,	Numeric(Complex)	KNOX-14-110030,	This allows for PIN code.  API: setPasswordQuality *

Policy Group	Policy Rule	Options	Settings	Related Requirement	Comment
		Numeric(Complex), Alphabetic, Alphanumeric, Complex		KNOX-14-110040	Or  setRequiredPasswordComplexity  If the management tool does not support <b>Numeric(Complex)</b> but does support <b>Numeric</b> , KPE can be used to achieve STIG compliance. In this case, configure this policy with value <b>Numeric</b> and use an additional KPE policy, (innately by management tool or via KSP) <b>Maximum Numeric Sequence Length</b> with value <b>4</b> .
<b>Device Password Policies</b>	Minimum password length	0+ characters	Six characters	KNOX-14-110050	API: setPasswordMinimumLength *
<b>Device Password Policies</b>	Max password failures for local wipe	0+ attempts	10 attempts	KNOX-14-110060	API: setMaximumFailedPasswordsForWipe *
<b>Device Password Policies</b>	Max time to screen lock	0+ minutes	15 minutes	KNOX-14-110070	API: setMaximumTimeToLock *
<b>Device Restrictions</b>	Face recognition	Enable/Disable	Disable	KNOX-14-110080	API: setKeyguardDisabledFeatures, KEYGUARD_DISABLE_FACE
